Re: Asbestos Hazard Emergency Response Act (AHERA) Asbestos Inspections and Management Plans.

The Yolo County Office of Education has hired Entek Consulting Group, Inc., a consulting company, to complete the required management plan of all asbestos-containing building materials in the school. The initial plan was completed in June 2018 by an accredited inspector, and the reinspection data has been incorporated into the Management Plan.

A copy of the district's management plan is available for review during normal office hours in the Support Operations Services office. If copies of the plan are desired, a nominal fee may be charged.
