

TUPE AT A GLANCE

YCOE TOBACCO USE PREVENTION EDUCATION NEWSLETTER

Nicotine among teens is at its all time high

Vaping among teens is at an all time high and many young adults don't realize they are becoming addicted to nicotine. Teens don't understand that it is altering their brain. Misconception is that vaping means "smoking vapor" and that it is water based. The reality is that it is an aerosol similar to hairspray that has many harmful chemicals in it.

- Do your teachers know how to identify a vape device?
- What percent of vaping related suspensions have happened in your district?
- Let's start the year off right by education our students and staff on the effects of nicotine.

Tasks to Complete

- Sign and Return MOU
- Setup TUPE budget
- Review State and Current Plans document
- Train teachers who will be delivering Stanford Prevention Tool kit curriculum

FIRST DEATH FROM VAPING ILLNESS

Back To School Night is a great place to have pamphlets available for students and parents on the effects of vaping

Upcoming Events

October 1 and 2
New TUPE Coordinators Meeting

November 6 and 7
Healthy Kids Conference

Leadership Meeting Dates

Please join us for a minimum of two leadership meetings this year

September 26	Review 2018 CHKS data
October 24	General Leadership Meeting
November 12	General Leadership Meeting
January 23	CHKS Review for deployment
